

WEEKLY NEWSLETTER No. 41

May 15, 1957

25X1A9a Received a report and letter dated May 6 from Jim  
[REDACTED] who reports that he is getting good results from all  
his units at Detachment C. No other word from our other field  
25X1A9a representatives. [REDACTED] left [REDACTED] May 10 and is 25X1A6a  
now home at the plant. [REDACTED] has now replaced him 25X1A9a  
25X1A6a at [REDACTED] and is the only FOG field representative. John  
25X1A9a [REDACTED] left our plant May 10 and left the country to return to  
Detachment A on May 11. As yet, we have received no word  
of his arrival.

We have made no shipments since the last writing.  
Unit No. 19 has been retrofitted and will be leaving our plant  
today or tomorrow. This unit was returned to us from [REDACTED] 25X1A6a  
25X1A9a and will be shipped to [REDACTED] 25X1A6a because it is one  
of his instruments. Nineteen Mark III handles are currently in  
production and the entire lot will be shipped some time next week.

Everything is going according to schedule and we should  
fulfill all our requirements by June 30.

Until next week.

Jack
